INTRODUCTION

The Social Planning and Research Council of Hamilton and District is constantly trying to provide information and statistics for the City of Hamilton and the surrounding communities.

This atlas is a companion document to the Social Planning Data Book for Hamilton-Wentworth: 1981 Census (June, 1984), providing geographic pictures for the statistical information presented in the Data Book. It is also an update to the Socio-Economic Atlas of the City of Hamilton, 1977.

Other census-related publications are planned for the future. The statistics in this report have been drawn from the 1981 Census (Statistics Canada) for the Hamilton Census Metropolitan Area (C.M.A.).

We hope you find this publication informative and useful. Your comments are always welcome.

HOW TO USE THIS DOCUMENT

An example is presented on the following pages to assist you in reading and understanding the maps provided in this document.

Each of the indicators presented in this report is a twomap set. The first map of a specific topic (e.g. Education: Less
Than Grade 9) has two sets of figures for each census tract in the
City of Hamilton and for every municipality in the HamiltonWentworth Region. The top figure represents the actual number of
persons, 15 years and over, with less than a Grade 9 education;
while the bottom figure is the percentage of the population, 15
years and over, with less than a Grade 9 education in the census
tract. Regional and area municipality totals are located in the
bottom right hand corner of the page.

The map that follows this statistical map is a shaded representation of the figures. The legend to this map is located in the bottom right hand corner of the page. The legend shows you which range of numbers is represented by which shade of colour.

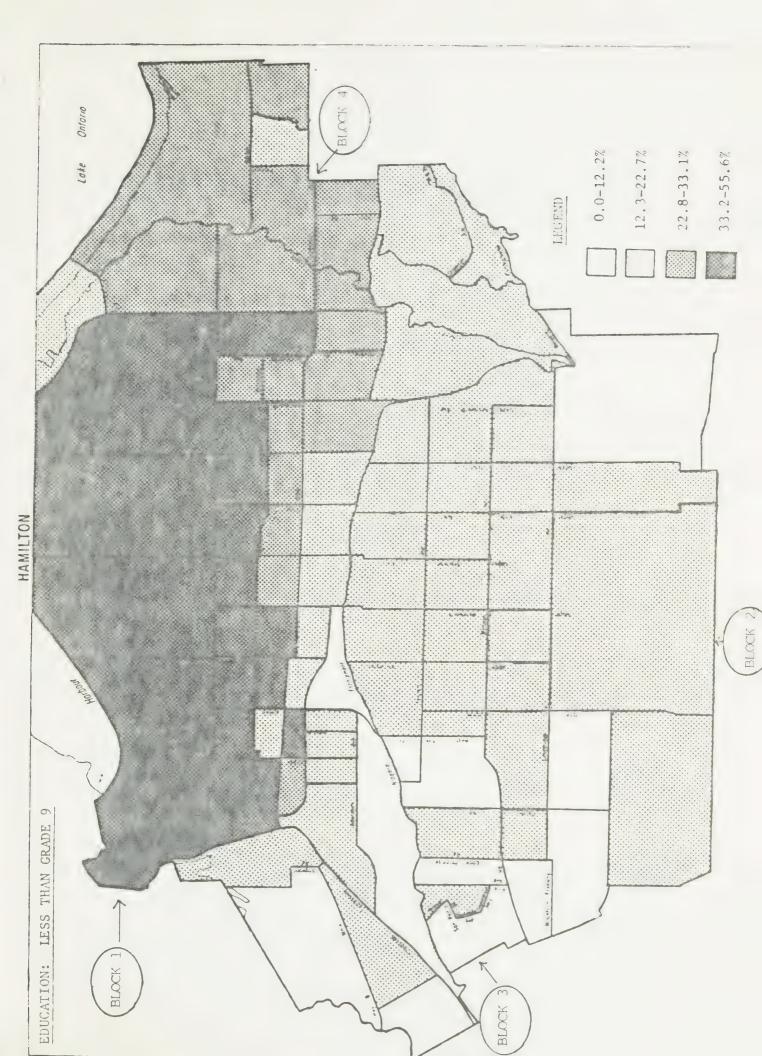

To interpret the shaded maps, you should look for certain trends (e.g. blocks of a similar shade) and use these to draw general conclusions. Using the example, Education: Less Than Grade 9, certain trends are quite evident. There is a large concentration of people between the Bay and Cannon Street with low education levels (as indicated by the large black shaded area labelled Block 1). There is an even smaller proportion of the population in the west end that are without any high school education (refer to map for area labelled Block 3). Conversely, in the east end of the City there seems to be a medium or above average number of people who possess less than a Grade 9 education (refer to map for area labelled Block 4). These generalities were made an an example to illustrate how to read and interpret the maps contained in this document.

A census tract reference map for the City of Hamilton follows the section outlining the Census definitions.

DEFINITIONS

The following has been drawn from information supplied by Statistics Canada regarding the proper 'definitions' for data contained in the 1981 Census.

Census Tract:

A permanent small census geostatistical area meeting the following criteria:

- a) the boundaries must follow permanent and easily recognized lines on the ground;
- b) generally, the population must be between 2,500 and 8,000, with a preferred average of 4,000 persons;
- c) the area must be as homogeneous as possible in terms of economic status and social living conditions; and
- d) the shape must be as compact as possible.

Age:

Refers to age at last birthday (as of the Census reference date, 3 June 1981).

Ethnic Origin:

Refers to the ethnic or cultural group to which the respondent or the respondent's ancestors belonged on first coming to this continent.

Religion:

Refers to specific religious groups or bodies, denominations, sects, cults or religious communities.

Unemployment Rate:

Refers to the percentage the unemployed force forms of the total labour force (in the reference week) in an area, group or category. The unemployed includes those persons who, during the week prior to enumeration:

- a) were without work, had actively looked for work in the past four weeks and were available for work; or
- b) had been on lay-off for 26 weeks or less and expected to return to their job; or
- c) had definite arrangements to start a new job in four weeks or less.

Participation Rate:

Refers to the percentage the total labour force (in the reference week) forms of the total population 15 years of age and over, excluding inmates in an area, group or category.

Less Than Grade 9 Education:

Refers to the percentage of the population 15 years of age and over with less than any secondary education (includes Kindergarten to Grade 8 and those with no schooling).

University Degree:

Refers to the percentage of the population 15 years of age and over who have completed the requirements for their degree (includes those with both university and other non-university education as well as those with university only).

Occupied Private Dwelling:

A private dwelling in which a person or group of persons is permanently residing.

Gross Rent:

The total average monthly payments paid by tenant households to secure shelter. Gross rent includes payments for electricity, oil, gas, coal, wood or other fuels, water and other municipal services and monthly cash rent.

Value of Dwelling:

The amount expected by the owner if the dwelling were to be sold.

Owner's Major Payments:

Refers to the total average monthly payments made by owner households to secure shelter.

Census Family:

Consists of a husband and a wife (with or without choldren who have never married, regardless of age) or a lone-parent, regardless of marital status, with one or more children (who have never married, regardless of age) living in the same dwelling.

Lone-Parent Family:

Consists of a parent, regardless of marital status (with no spouse present) with one or more children living in the same dwelling.

Total Income:

The sum of amounts received during 1980 by an income recipient (15 years of age and over) from all sources.

Average Income:

The average family/household income refers to the weighted mean total income of families/households in 1980. (Family/household total income refers to the sum of the total incomes of the members of the family or household, 15 years of age and over).

Average Employment Income:

The weighted mean total employment income per unit of a particular 'roup. (Employment income refers to the total income received by persons 15 years of age and over during 1980 as wages and salaries, net income from non-farm self-employment and/or net farm income).

Average Census Family Income:

Refer to definition of 'Average Income'.

Economic Family:

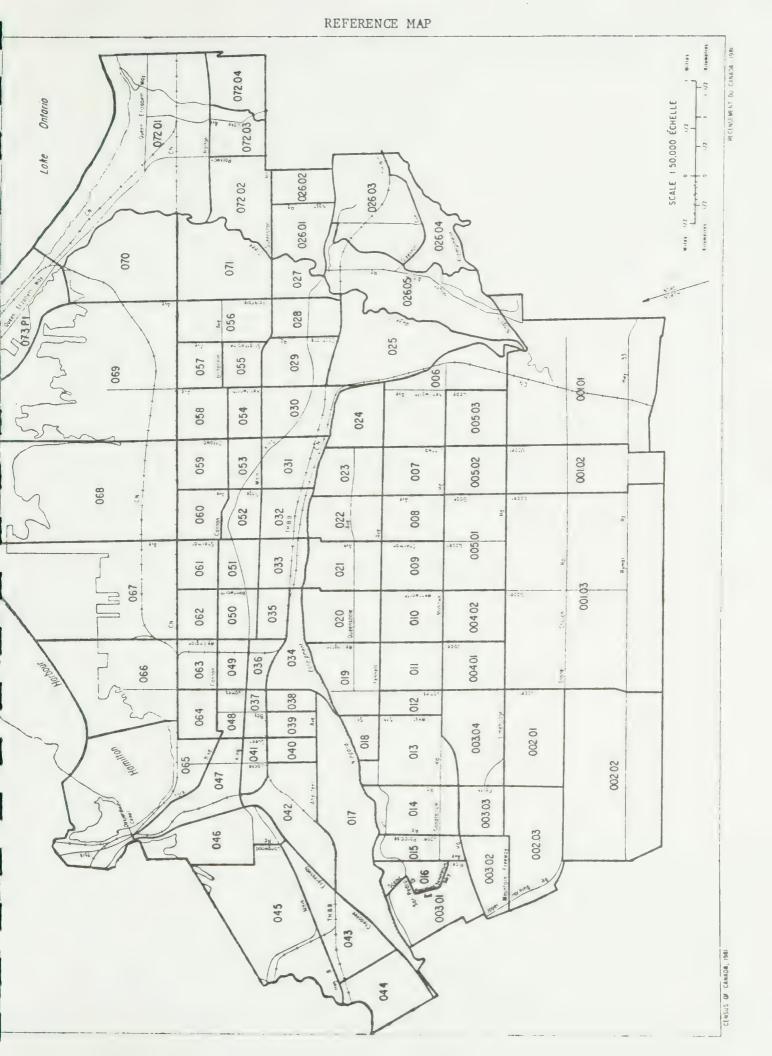

A group of two or more persons who live in the same dwelling and are related to each other by blood, marriage or adoption. Persons living common-law are considered, for census purposes, as now married.

Incidence of Low Income:

The incidence of low income is the percentage of family units below the low income cut-off points. On the basis of the total income of a family unit adjusted for federal Child Tax Credit, size of family unit and size of the area of residence, the position of each unattached individual and economic family is determined in relation to low income cut-offs based on the 1978 Family Expenditure Survey and updated by changes in the Consumer Price Index.
